PROFESSIONAL SUMMARY

Motivated and detail-oriented Web Developer with strong knowledge of HTML, CSS, JavaScript, React.js, Node.js, and MongoDB. Passionate about building responsive and user-friendly web applications. Seeking an entry-level Web Developer position where I can contribute my technical skills while continuing to learn and grow.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman

Concepts: REST API, Responsive Design, Authentication, JWT, CRUD Operations

---

Root & Leaf | Full-Stack E-Commerce Application

Tech Stack: React.js | Node.js | Express.js | MongoDB | JWT | Tailwind CSS | bcrypt

- Developed a full-stack e-commerce application using React, Node.js, Express.js, and MongoDB.
- Built RESTful APIs for application modules, with structured routing, middleware, and database models and Implemented JWT-based authentication, password hashing with bcrypt, and role-based authorization.
- Developed product and category management functionality, including product creation, editing, stock tracking, and category association.
- Built a responsive React interface using Tailwind CSS and React Router, integrating frontend components with backend APIs
- Organized the application into reusable frontend components and maintainable backend modules.

React Auth – Authentication & User Management System

Tech Stack: React.js | Node.js | Express.js | MongoDB | JWT | Tailwind CSS | Vercel

- Developed a full-stack authentication and user management application using React.js, Node.js, Express.js, and MongoDB.
- Implemented user registration/login, JWT-based authentication, password hashing with bcrypt, protected routes, and RESTful APIs.
- Built CRUD functionality for user management using Express.js, Mongoose, and MongoDB Atlas.
- Deployed the application on Vercel and configured the backend for production MongoDB connectivity.

TaskFlow – To-Do Application

Tech Stack: React.js | JavaScript | Tailwind CSS | Local Storage | Vercel

- Developed a responsive task management application using React.js and Tailwind CSS.
- Implemented task **CRUD operations**, including adding, completing, deleting, and clearing tasks.
- Added **task filtering and statistics** to manage All, Active, and Completed tasks.
- Used **React Hooks and LocalStorage** to manage application state and persist tasks across browser sessions.
- Designed a responsive and interactive UI with reusable React components.
